Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 16-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Zawodny et al.

Regarding claim 16, Zawodny et al. disclose a winding tool comprising “an upper surface (67); a lower surface (66, reference character missing from drawing); a circumferential edge (63), perpendicular to and bounded between said upper surface and said lower surface; a plurality of winding prongs (65, “extending out from its bottom face 66”, col 5, lns 11-23) extending perpendicular from said lower surface and arranged to engage mating holes in the loyalty camera; a winding handle (68) extending perpendicular from said upper surface; a key portion (62) extending from said winding tool to engage a film door lever of the loyalty camera. The claim limitations of claims 17-20 are clearly shown in figures 6 and 7 of Zawodny et al.

Allowable Subject Matter

Claims 1-15 and 22-26 are allowed.

Claim 21 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:

The prior art does not disclose or suggest a "lever arm biased into contact with a portion of said anti reversal pawl ... a winding tool including a film advance wheel engaging portion which

Art Unit: 2851

engages said film advance wheel to push said lever arm out of contact with said spindle" in combination with the remaining claim elements as set forth in claims 1-15.

The prior art does not disclose or suggest "plurality of key prongs extend from said upper surface" in combination with the remaining claim elements as set forth in claim 21.

The prior art does not disclose or suggest "providing a loyalty camera ... lever arm biased into contact with a portion of said anti reversal pawl ... providing a winding tool ... including a film advance wheel engaging portion which engages said film advance wheel to push said lever arm out of contact with said spindle" in combination with the remaining claim steps as set forth in claims 22-26.
